

肺がん

78.6%

Table with 58 columns (No. 1-58) and multiple rows of data. Columns include 'No.', '1', '2', '4', '5', '6', '7', '8', '12', '17', '18', '20', '21', '22', '23', '24', '27', '28', '29', '34', '37', '40', '43', '44', '47', '48', '55', '57', '58'. Rows contain various survey questions and their corresponding responses across different regions.

肺がん

78.6%

回収率 93.6%

Table with 141 columns (No. 59-141) and 141 rows (1-141). Columns represent different municipalities and their respective medical institutions. Rows represent various survey items related to lung cancer diagnosis, including patient distribution, information provision, examination methods, and quality management. The table contains a large amount of data points, mostly represented by 'O' and 'X' marks, indicating the status of each item in each municipality.

肺がん

78.6%

Table with columns for hospital names (No. 144-213) and rows for various metrics (1-10) such as screening rates, data distribution, and quality management. Includes a '通過率' (pass rate) row at the bottom of each section.

肺がん

78.6%

Table with columns for survey items (No. 214-292) and rows for various municipalities (e.g., 那覇市, 沖縄県, etc.). It contains detailed data on lung cancer screening rates, methods, and facility management across different regions.
